Wireless with more...

Whatever your wireless needs,
Advanced has the solution

Axis^{EN}

AxisGo

More Convenience

Our Axis wireless devices are powerful, reliable and fast to install and configure. Rigorously tested to meet EN54-25 standards, Axis devices operate seamlessly with our Axis EN range of high-performance panels and can be used as part of completely wireless or hybrid systems.

More Support

Our team of technical experts has your back, whether you're planning, installing or servicing your wireless system. We also offer free training and support* for the lifetime of your Advanced equipment.

*for direct customers

More Versatility

We offer fully wireless or wired/wireless hybrid solutions. So, whether you're extending wired systems on sites where downtime's not an option, protecting sensitive sites where re-wiring would be too disruptive or you simply need a fast-fit temporary install, we've got you covered.

More Standards peace of mind

Axis EN and AxisGo panels are rigorously tested and approved to EN 54 Parts 2 and 4 and carry the prestigious FM Approved mark.
